Approved For Release 2005/04/22 : CIA-RDP85B00803R000100080057-4

5 November 1963

Col. Roy H. Worthington, 162 Program Director in memo to
[redacted] LMSC Mgr for 162 Program

Said he addressed his request to LMSC, in view of an Air Force review of the program, to make an in-house investigation.

".....The present organization appears to be a loose conglomerate of overlapping, undefined functions. The delineation of responsibilities is obscure, ill defined, or non-existent. The authority to fulfill responsibilities that are defined and assigned seems not to have been delegated."

He recommended LMSC conduct an audit of all activities and functions including those at Vandenberg launch area, and present to SSD a briefing on progress by 25 November and a written report by 15 December 1963, giving recommended action and a schedule for its implementation.

NRO review(s) completed.
